

LOBBYWORKS™ VISITOR MANAGEMENT SYSTEMS

Visitor Management Suite, Version 4.2

The LobbyWorks Visitor Management Suite enhances your investment in access control and perimeter security by providing a simple and effective way to register, badge and track visitors. It gives you the ability to generate detailed visitor traffic reports and enforce visitor/contractor security policies.

Power and flexibility make LobbyWorks a natural fit for small single-site deployments using the Express Edition or regional WAN-based network deployments using the Premier Edition. System offerings allow you to tailor your visitor management system to best meet your needs.

- Front Desk – register and track visitors
- Reporter – generate reports
- Administrator – control security policies
- Scheduler – coordinate and execute automation activities
- Badge Pre-print – pre-prints badges
- Scanner – allows for traditional 1D barcodes and also bespoke 2D scanning.

The **Premier Edition** supports optional add-ons as your system grows.

- LobbyWorks Kiosk – self-registration station for visitors
- LobbyWorks Web Center – employees pre-register visitors
- Notify – host notification upon visitor's arrival

Visitor registration is quick and simple and can be performed either at a guard station or using an optional self-registration kiosk. LobbyWorks scans the photo ID or business card of an arriving visitor, then instantly checks whether the visitor is expected or has been in the facility before and makes sure the visitor is not on a watch list. These quick and consistent checks ensure that only the right people are allowed on site. After scanning the information, LobbyWorks takes a digital photo or captures the visitor's signature.

LobbyWorks can automatically contact the visitor's host by email or with real time network messaging to announce the visit. Once the visitor is registered, an individualized badge is generated. Specific visit restrictions may be set, such as clearance level, access area or visit expiry time.

At the end of the visit, LobbyWorks signs out the visitor. If the visitor does not sign out, LobbyWorks can contact the host to check if the visitor has left the site.

This simple yet powerful visitor registration process forms the basis of a very powerful security platform. Registering all visitors through LobbyWorks ensures that you have a centralized and complete record of your visitor traffic, strengthens visitor security, and improves productivity and service to your customers.

FEATURES

Pre-registration

- Entry into system by lobby receptionist
- Outlook® vCalendar integration via POP3¹
- Web Center add-on for pre-registration by hosts^{1, 2}
- Bar code on email pre-registration notification sent to visitor can be scanned at the kiosk for fast processing

Registration

- Process most visitors in 20 seconds or less
- Capture visitor's photo and/or signature
- Scan arriving visitor's photo ID or business card
- Print professional color visitor passes with expiration date, visit area, host, and purpose of visit
- Issue Pro-Watch® access control raids

- Entry into system by administrator or lobby receptionist
- Integration with Active Directory¹
- Integration with Pro-Watch

SYSTEM OVERVIEW

LobbyWorks Express Edition

LobbyWorks Express Edition is a single-workstation license that supports connectivity to registration devices such as cameras, signature pad, barcode scanner, business card scanner, driver license and passport scanner, and card reader. Express Edition supports up to 500 hosts and is compatible with Windows XP Editions, Windows 7 Editions, Windows 2012.

LobbyWorks Express System

LobbyWorks Premier Edition

Premier Edition includes full-featured visitor management with interfaces to cameras, signature pad, barcode scanner, business card scanner, driver license scanner, and card reader. Premier Edition can be networked with up to 20 additional licenses for Front Desk, Kiosk, or Reporter. LobbyWorks Web Center for web-based pre-registration and LobbyWorks Notify for real-time network notification are also available as options for Premier Edition.

A total of 5,000 host license are included with Premier Edition. With add-on licenses, Premier Edition can support up to 50,000 hosts, unrestricted Notify clients, and 25 concurrent Web Center log-ons. Supported databases are SQL Server Versions: 2005, 2008 R2 Express and compatible operating systems include Windows server 2003/2008 standard, Windows 2012 Server 64bit R2 Edition, Windows XP Editions, Windows 7 Editions.

SYSTEM APPLICATIONS

LobbyWorks Front Desk

LobbyWorks Front Desk facilitates reception-assisted registration and tracking of visitors. For an expected visitor, the Front Desk user pre-loads a visitor's information including name, contact details, date(s) of visit, and planned host into the Windows based application. The Front Desk operator may also register a large number of people as a group by importing group members from a text file. For an unexpected visitor, Front Desk automatically compares visitor information against a pre-determined watch list and if a match is found, the Front Desk user may choose whether to continue with registration. Once registration is complete, the Front Desk application can automatically contact the host for visit authorization via the Notify application (Premier Edition only) that is installed on each host's computer. One license of the LobbyWorks Front Desk application is included in LobbyWorks Premier and Express Editions and comes complete with photo ID/business card scan, photo and signature capture, badge printing, visitor sign in/out tracking, watch list filtering, emergency list report, delivery and asset tracking, visitor access card tracking and much more. Additional licenses of Front Desk can be separately purchased for LobbyWorks Premier Edition.

LobbyWorks Administrator

LobbyWorks Administrator taps into the flexibility and power of LobbyWorks to tailor it to your specific facility and business needs. Control security policies for visitors and contractors, user permissions, badge and report templates, and much more.

Scheduler

The Scheduler application coordinates and executes automation activities within LobbyWorks such as employee list synchronization, calendar integration, and closing or signing out of temporary hosts and visitors at the end of the day. Calendar integration is only available in the LobbyWorks Premier Edition.

Badge Pre-Print

Pre-prints badges for pre-registered visitors expected that day.

Reporter

Allows authorized personnel to generate detailed visitor traffic reports and graphs for each day, week, month or year for true reporting flexibility at your fingertips. View traffic per employee, visitor, department, location, building or company. One license of LobbyWorks Reporter is included in Express and Premier Editions and can save reports in HTML, PDF, CSV or RTF formats. Additional licenses of Reporter can be separately purchased for LobbyWorks Premier Edition.

OPTIONAL ADD-ON LICENSES

LobbyWorks Add-on Host

You can purchase more licenses to increase the number of supported hosts above the 5,000 included in the Premier Edition. The maximum number of hosts in Premier Edition cannot exceed 50,000. Each person who may receive visitors is a host.

LobbyWorks Web Center

Used by employees to pre-register their visitors, and by authorized security personnel to view visitor traffic and validate visitor badges. Runs on IIS 7, 7.5, 8 Supports browsers IE8, 9, 10 and Chrome.

LobbyWorks Notify

Informs host upon visitor's arrival via a pop-up application installed on each host's PC.

Pro-Watch® Integration

The Pro-Watch connector allows Front Desk operators to assign access privileges to visitors within Pro-Watch for a visitor badge. The connector also imports hosts from Pro-Watch and allows the Front Desk operator to issue a temp card to a host who has forgotten their access control card. A host's permanent card is automatically disabled in Pro-Watch when a host temp card is issued. A Pro-Watch reader can now be used to exit the premise and complete the visit.

LobbyWorks Kiosk

Facilitates visitor self-registration and can also provide information such as safety videos and visit agreements. The new Kiosk offers increased performances and new 3MP industrial quality fixed camera, touchscreen using PCAP touch technology and new scanner for bar-codes to be read on mobile devices.

Our next generation kiosk offers:

- Kiosk PC – Based on a modern PC, this new version offers increased performance.
- Kiosk Webcam – new 3MP industrial quality fixed camera
- Kiosk Touchscreen – PCAP touch technology similar to an ipad / iphone
- Kiosk Barcode scanner – New scanner allows for barcodes to be read on mobile devices.

SYSTEM MINIMUM REQUIREMENTS

LobbyWorks Client	
FEATURE	REQUIREMENT
RECOMMENDED PROCESSOR	Intel Pentium IV or equivalent
PC MODEL USED FOR TESTING	DELL Optiplex GX280
RECOMMENDED OPERATING SYSTEM ³	Windows server 2003/2008 standard, Windows XP Editions, Windows 7 Editions. (32 and 64 bit), Windows 2012 Server OS 64 bit R2 edition
RECOMMENDED PC TYPE (SERVER OR WORKSTATION)	Workstation or Server
RECOMMENDED SYSTEM MEMORY (RAM) ²	2 GB for Windows XP SP3, 4 GB for other OS
CD AND DVD DRIVE	Yes
HARD DRIVES	Capacity: 40 GB Software: Windows Operating System, Microsoft Office software
USB CONNECTION	2.0
NETWORK CONNECTION	100 Mbits/sec or greater
VIDEO RESOLUTION	1024x768 pixels; 24-bit color or higher
MULTIMEDIA	Standard VGA Graphics Adapter [Display adapter]

¹ Windows Server 2003/2008 is supported for Administrator and Scheduler only.

² Includes RAM required by the client machine to run the Windows operating system.

³ Consult Microsoft® for operating system and database license terms.

LobbyWorks Server^{1, 2}

¹ For a system to be considered small, the LobbyWorks system must have fewer than 1,500 hosts, fewer than 5 clients, and fewer than 400 visitors per day.

² To install LobbyWorks on a server with Pro-Watch®, you must add the LobbyWorks recommended memory and RAM requirements for the larger system server specification to those of Pro-Watch and MS-SQL.

³ RAID technology used for the larger system server – disk set 1 and 2. When several physical disks are set up to use RAID technology, the operating system will be installed as on single disk.

⁴ Consult Microsoft® for operating system and database license terms.

SOFTWARE FIRST LICENSE

NOTE: A customer information form must be completed before the order can be processed.

LWWMSEED	Express Edition (includes 500 hosts), 1 Front Desk license, 1 Reporter license, Badge Re-print license, Scheduler license, and Administrator license
LWWMSPRE	Premier Edition (includes 5,000 hosts), 1 Front Desk license, 1 Reporter license, Badge Re-print license, Scheduler license, and Administrator license
